Professional Summary — Analytical and detail-oriented Data Analyst with hands-on experience in data mining, predictive analytics, and strategic data reporting. Adept at collecting, organizing, analyzing, and interpreting large datasets from both on-premises and cloud-based systems. Skilled in Python, SQL, Power BI, and Excel with a sound knowledge of data privacy regulations and statistical concepts. Strong communicator with a business-focused mindset to convert insights into opportunities. Committed to data accuracy, problem-solving, and driving informed decision-making.

Education —

Master of Computer Applications (MCA)

Visvesvaraya Technological University
Percentage: 91.1% (till 3rd semester)

Pursuing, 2025
Karnataka

Bachelor of Computer Applications (BCA)

Patliputra University
Percentage: 70%

2023
Patna, Bihar

Technical Skills —

Languages	Python, Java, C, HTML, CSS, JavaScript, Tailwind CSS
Libraries	Pandas, NumPy, Matplotlib, Seaborn
Databases	MongoDB, SQL, MySQL
Tools	Power BI, MS Excel, PowerPoint
Platforms	Jupyter Notebook, Visual Studio, PyCharm
Analytics Techniques	Predictive Analytics, Data Mining, Statistical Modeling, Reporting

Projects —

Vendor Performance Analysis

- Developed an interactive Power BI dashboard to evaluate vendor performance using key KPIs such as on-time delivery, defect rates, and cost efficiency. Improved decision-making by visualizing supplier trends, enabling 25 percentage faster vendor selection and performance reviews. [Link](#)

Netflix-dash-board

- Designed an interactive Power BI dashboard analyzing Netflix titles dataset.
- Provided insights into genre distribution, release year patterns, and regional content availability. [Link](#)

Coffee Sales Analysis - Dashboard

- Built an interactive Power BI dashboard on 1100+ transactions for sales insights.
- Performed data cleaning and EDA using Python (Pandas, Seaborn).
- Designed key KPIs: Total Revenue, Transactions, Unique Customers, % Card Payments.
- Identified trends in top products, sales by time, and payment methods. [Link](#)

Amazon Sales Data Analysis

- Cleaned and analyzed large-scale sales datasets using Python, Pandas, and Matplotlib; performed exploratory data analysis (EDA), uncovered seasonal sales trends, and built data visualizations to support strategic business decisions [Link](#)

Movies Analysis

- Analyzed user behavior, content types, and viewing patterns using Python and Seaborn; conducted churn rate analysis and identified top-performing genres through data visualization and content analytics. [Link](#)

Diwali Sales Data Insights

- Performed exploratory data analysis (EDA) on Diwali sales dataset using Python to identify purchasing behavior across customer demographics; created interactive visualizations to highlight key sales metrics and trends. [Link](#)

Work Experience —

Data Analytics Intern – IIIT Dharwad (Nov 2024 – Jan 2025)

- Worked on preprocessing large datasets using Python libraries such as Pandas and NumPy.
- Performed exploratory data analysis (EDA) to derive actionable insights.
- Created data visualizations and summary reports to support decision-making.

Certificate —

- IIRS-ISRO Remote Sensing Certificate [View Certificate](#)
- 30 Days MasterClass in Data Analytics [View Certificate](#)

Interests —

- Passion for Travel, enhancing adaptability and cultural awareness
- Enthusiastic Vocal Performer, fostering creativity and confidence
- Strategic Gamer, developing problem-solving and decision-making skills
